- ▶ Test and evaluation
- ▶ Independent verification and validation
- ▶ Cybersecurity

TASC Wins USG ONE IDIQ Contract for Engineering and Communications Services

Chantilly, VA – TASC, Inc. has won an indefinite-delivery/indefinite-quantity contract, the United States Government's Omnibus Network Enterprise (USG ONE), to provide a range of engineering and communications services supporting U.S. government agencies. The one-year contract has four option years and a potential value of \$476 million for all awardees.

"Our goal is to deliver sophisticated engineering and game-changing mission solutions that are efficient, smart and secure," says Richard Bowers, vice president of Mission Solutions at TASC. "We have assembled an expert team from a number of companies in order to have the right mix of technical expertise and mission experience to meet the government's complex engineering and technology needs."

Under the USG ONE contract, TASC is one of nine companies that will be allowed to bid on individual task orders to deliver support services in areas such as systems engineering, information assurance, security, test and evaluation, enterprise architecture and program management. Eighteen companies have joined the TASC subcontractor team to deepen capabilities in the government's mission-critical areas.
