

TASC Showcases Transformational Biomedical Solutions at Aerospace Medical Association 81st Scientific Meeting

Phoenix, AZ — May 10, 2010 — TASC capabilities and accomplishments in advisory services for the medical market are being displayed at the Aerospace Medical Association (AsMA) conference May 10-11 in Phoenix, AZ. TASC has been a trusted provider of medical-related solutions in biomedical research, aerospace vision, financial services and cost estimation and countering weapons of mass destructions.

"TASC, working closely with its government colleagues, has developed transformational solutions focused on advanced technologies and biomedical research. Our solutions have helped U.S. military personnel benefit from laser systems, night vision devices, corneal refractive surgery, and vision protection systems," says Dr. Bob Cartledge, manager of TASC's Biomedical Sciences and Technologies Department. "For many years, our team of scientists, engineers and clinicians has worked side-by-side with the U.S. Air Force and their customers to support their vision programs as well as develop systems to address threats to aviation from laser illuminations."

The TASC team supports the USAF and other federal agencies in several important areas. TASC optometrists and vision scientists support the USAF Aviation Corneal Refractive Surgery Surveillance Program, which assesses the impact of PRK and LASIK surgeries on long-term aviator vision. TASC biologists, physicists, and engineers conduct laser bioeffects research for the Air Force, Army and Navy that leads to national laser safety standards. And for the Surgeon General of the Air Force, TASC delivers formulation and funds control services, ensuring efficient, on-budget financial management. Our S&Es at DTRA develop innovation approaches to tracking diseases and modeling of hazardous plumes.

To learn more about TASC's biomedical solutions, download the [Brochure](#) or contact Peter A. Smith, Ph.D. (peter.smith@tasc.com; 210.367.7489) or John Graves, Program Manager, (john.graves@tasc.com; 210.875.6864).

About TASC

TASC is the premier, non-conflicted provider of advanced system engineering, integration and decision-support services across the intelligence community, Department of Defense and civilian agencies of the federal government. Formerly a unit of Northrop Grumman Corporation, TASC became an independent company in December 2009. For more than 40 years, TASC has partnered with our customers toward one goal -- the success of their

missions. Our broad portfolio of services includes system and policy analysis; program, financial and acquisition management; enterprise engineering and integration; advanced concept and technology development; and test and evaluation. With nearly 5,000 employees, TASC generates more than \$1.6 billion in annual revenue. For more information and career opportunities, visit www.tasc.com.
