TASC, Inc. Names Mark Leary Chief Information Security Officer

Chantilly, VA — TASC, Inc., a leading provider of advanced systems engineering, integration and support services to the Intelligence Community, Departments of Defense and Homeland Security and other federal agencies, has named Mark Leary chief information security officer (CISO).

"The growing sophistication of the cyber threats against both government and industry requires assertive and integrated measures to defend our national security," says Barbie Bigelow, vice president and chief information officer of TASC. "Mark's extensive career experience in military and private industry information security will ensure that TASC's corporate information infrastructure remains secure, resilient and agile."

As CISO, Leary will have responsibility for the leadership, management and oversight of TASC's information security services in order to deliver a full range of IT security and resiliency capabilities across the enterprise. In this new position, Leary will also provide expertise and support in the cybersecurity market.

Leary joins TASC from Northrop Grumman Corporation, where he served most recently as Director and Deputy Chief Information Security Officer. Leary retired from the U.S. Army after 22 years in military intelligence. He earned an MBA from George Mason University, as well as several undergraduate and graduate degrees in technology management. Leary has been board-certified as a Certified Information Systems Security Professional, Certified Information Security Manager, Certified in the Governance of Enterprise IT, in addition to earning certification of his IT security skills from several U.S. government agencies.

"Mark's unique perspective on the needs of corporate and government information users will help TASC continue to deliver the best programs and engineering to our customers," says Bigelow. "His extensive business experience, combined with his knowledge in managing complex IT security risk and compliance challenges, will keep TASC positioned as a reliable, trusted partner focused on meeting our customers' needs."
