TASC, Inc. Wins SeaPort-e IDIQ Contract from Naval Sea Systems Command

Chantilly, VA – TASC, Inc. has been awarded an IDIQ (indefinite delivery/indefinite quantity) SeaPort-e contract from Naval Sea Systems Command (NAVSEA). Under this new contract, TASC and its partners are eligible to deliver a full range of research, development and management services to NAVSEA at Marine and Navy sites across the United States.

“The TASC team is comprised of seasoned engineers and scientists who have supported NAVSEA for many years,” says Pat Talty, vice president of Mission Engineering at TASC. “We are proud and pleased to continue our longstanding association with the U.S. Navy.” The TASC SeaPort-e team served on Northrop Grumman Corporation’s SeaPort-e team before the two companies separated in 2009.

TASC successfully bid in 22 functional areas including support in quality assurance; information assurance and information technology; in-service engineering, fleet introduction, installation and checkout support; and measurement facilities, range and instrumentation support.

“NAVSEA’s mission is complex and vitally important to our nation’s security,” says Talty. “We are confident TASC has the team and capabilities to support it.”
