TASC Strengthens Intelligence Support Team in Ft. Meade Area

Chantilly, VA — April 29, 2010 — TASC, Inc. (TASC) further strengthens its intelligence support team based in the Ft. Meade area with the addition of new two key executives and promotion of two employees who played important roles in the success of TASC's Maryland business.

TASC, a leading provider of advanced systems engineering and decision support services to the Intelligence Community, and with a growing presence in the Department of Defense and civilian agencies of the federal government, continues to leverage its newly achieved status as the premier government contractor without conflict of interest constraints.

"As the Defense Information Systems Agency (DISA) and other agencies move to Ft. Meade, we want to be sure that we have the right team in place, providing thought leadership and program execution to ensure mission success," said Wood Parker, President and Chief Executive Officer of TASC. "For decades, the Intelligence Community has relied on TASC to design and integrate the systems that keep our country secure."

Richard (Dick) Bowers joins TASC as Director of the Cryptologic Systems Operating Unit. Dick has over 30 years of serving the National Security Agency (NSA) as a senior executive at Northrop Grumman, AT&T, Lockheed Martin and SAIC. Dick replaces Terry Santavicca, who will retire after 38 years of service as a senior NSA official and 8 years at TASC.

Paul Thrasher joins TASC as a Senior Member of the staff. Paul brings over thirty years of expertise in information operations and will focus on expanding TASC's cyber offering to NSA, Cyber Command, DISA and other clients moving to Maryland.

TASC also promoted Ken Russell and Kevin Houley to Director. Ken currently heads the Operations Department of Cryptologic Systems and has more than 30 years of experience in the intelligence community as a systems engineer and mission support specialist. Kevin currently leads the AXISS program for TASC and brings unmatched expertise in cyber security, information technology and leadership skills.

"For the past 12 years, TASC has strongly supported NSA at Ft. Meade." says Parker. "The Base Realignment and Closure (BRAC) process will result in a greater concentration of current and new TASC customers in the Ft. Meade area. We are committed to recruiting and promoting the best people to serve our customers and fulfill their vital missions."

About TASC

TASC is the premier, non-conflicted provider of advanced system engineering, integration and decision-support services across the intelligence community, Department of Defense and civilian agencies of the federal government. Formerly a unit of Northrop Grumman Corporation, TASC became an independent company in December 2009. For more than 40 years, TASC has partnered with our customers toward one goal—the success of their missions. Our broad portfolio of services includes system and policy analysis; program, financial and acquisition management; enterprise engineering and integration; advanced concept and technology development; and test and evaluation. With nearly 5,000 employees, TASC generates more than \$1.6 billion in annual revenue. For more information and career opportunities, visit our website at www.tasc.com.
